

**Company**                      **Endress+Hauser Conducta GmbH+Co. KG**  
**Dieselstrasse 24, 70839 Gerlingen, Germany**

declares as manufacturer of analytical products that our product

**Product**                      **Liquiline M CM42**

**Regulations**                is specified and tested for an ingress protection level according to IEC/EN 60529 of

**IP 66/67**

The specified ingress protection can only be ensured if electrical and mechanical installation is in accordance with the associated product documentation.

The IEC/EN 60529 standard specifies types of protection for electrical equipment against the ingress of solid foreign bodies, dust, water, and contact. Compliance with this standard ensures that the device functions properly under normal operating conditions and in environments that meet the conditions specified in the standard.
